RE New Concrete Rubble Stockpile (B850) - Concurrence

Dear Mr. Legare

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed your May 29, 2002 letter proposing a new location for stockpiling recycled concrete rubble. The new location is indicated to occupy the area now occupied by Building 850, as well as the parking lot to the west of B850. Based on the information provided with your letter, this site should meet the minimum criteria identified in Section 7.1 of the Concrete Recycling RSOP once B850 has been removed, remediation is complete, and the site properly leveled. As such, we hereby concur with your proposal for the new stockpile site with the following condition:

The east half of the B850 footprint does not appear to be suitable for use as a concrete stockpile area due to the presence of a basement in B850 and possible slope or grade changes related to final site configuration. As such, prior to inclusion of this area (east half of the B850 footprint) for stockpiling concrete, the basement, including the drains and sewer system associated with B850, must be properly remediated, filled, compacted, leveled, and the appropriate documentation provided to us. This information may be provided utilizing the consultative process, as well as included in the closure report for B850.

In addition, backfilling the basement of B850 with concrete is not authorized under this concurrence letter. Prior to possible utilization of this site for concrete backfilling, you must provide the appropriate information as indicated in Section 8 of the Concrete RSOP.

If you have any questions regarding this correspondence, please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator

RE New Concrete Rubble Stockpile (B850) - Concurrence

Dear Mr Legare

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed your May 29, 2002 letter proposing a new location for stockpiling recycled concrete rubble. The new location is indicated to occupy the area now occupied by Building 850, as well as the parking lot to the west of B850. Based on the information provided with your letter this site should meet the minimum criteria identified in Section 7.1 of the Concrete Recycling RSOP once B850 has been removed, remediation is complete, and the site properly leveled. As such, we hereby concur with your proposal for the new stockpile site with the following condition.

The east half of the B850 footprint does not appear to be suitable for use as a concrete stockpile area due to the presence of a basement in B850 and possible slope or grade changes related to final site configuration. As such, prior to inclusion of this area (east half of the B850 footprint) for stockpiling concrete, the basement, including the drains and sewer system associated with B850, must be properly remediated, filled, compacted, leveled and the appropriate documentation provided to us. This information may be provided utilizing the consultative process, as well as included in the closure report for B850.

In addition, backfilling the basement of B850 with concrete is not authorized under this concurrence letter. Prior to possible utilization of this site for concrete backfilling, you must provide the appropriate information as indicated in Section 8 of the Concrete RSOP.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruckek at (303) 692-3328.
